DEPARTMENT OF BOTANY

FIELD VISIT REPORT ON AKSHAYAKALPA ORGANIC FARM, TIPTUR,

The Department of Botany of Sree Siddaganga College of Arts, Science and Commerce for Women, Tumkur, organized a one-day field visit to **Akshayakalpa Organic Farm, Tiptur**, on **26-10-2026** with the objective of providing students with practical knowledge of organic farming, animal husbandry and sustainable agricultural practices.

A total of **40 students and 2 faculty members** participated in the field visit. The team departed from the college at **9:15 a.m.** and reached Akshayakalpa Organic Farm at **11:20 a.m.**

The visit began with a video presentation in an open hall, introducing the students to Akshayakalpa Organic Farm, its activities and its commitment to organic farming and sustainable agricultural practices. The presentation helped students understand the importance of chemical-free farming, environmental conservation and responsible food production.

Following the presentation, the students visited the **honeybee-keeping unit**, where they learned about beekeeping and the importance of honeybees in pollination and maintaining ecological balance. This provided them with an understanding of the relationship between insects and plants in the ecosystem.

Next, the students visited the **cattle farming unit**, where they observed the management and care of cattle. They gained knowledge about the role of livestock in organic farming, particularly in providing organic manure that helps improve soil fertility and supports sustainable agriculture.

The group then visited the **vegetable cultivation fields**, where students observed the cultivation of different vegetables and learned about organic vegetable production.

Finally, the students visited the **poultry unit**, where they learned about poultry management and its role in integrated farming systems.

The field visit was an informative and enriching experience for the students. It helped them connect their theoretical knowledge of Botany with practical applications in organic agriculture, plant cultivation, pollination, and integrated farming.
