DEPARTMENT OF MICROBIOLOGY

FIELD VISIT REPORT ON AKSHAYAKALPA ORGANIC FARM, TIPTUR,

"The Department of Microbiology organized an industrial visit to Akshayakalpa Organic Farm at Tiptur on 26-10-2026 as a part of the final year students curriculum in Dairy Microbiology which providing students with an excellent opportunity to gain practical exposure to the dairy industry and understand the role of microbiology in food production and quality assurance.

During the visit, students were introduced to the various stages of dairy processing, from milk collection and testing to processing, packaging, and distribution. The visit provided valuable insights into the importance of maintaining hygiene, sanitation, and quality standards at every stage of production.

The students learned about the application of microbiological techniques in assessing milk quality, detecting microbial contamination, ensuring food safety, and maintaining product quality. They also gained an understanding of the significance of beneficial microorganisms, quality control procedures, and hygienic practices in the dairy industry.

The visit helped students bridge the gap between theoretical knowledge and its practical applications in industrial settings. It also enhanced their understanding of the role of microbiologists in the food and dairy sectors.

Overall, the industrial visit was an informative and enriching experience that broadened the students' knowledge of industrial microbiology, food safety, and quality management. The Department of Microbiology sincerely appreciates Akshayakalpa Organic for providing this valuable learning opportunity.
